Re: MassDEP # 125-0974  
100 Long Ridge Road  
40B – Application for Comprehensive Permit

Dear Mr. Ascolillo and members of the Conservation Commission:

At the initial public hearing for the above referenced project the self-introduced attorney representing some neighbors to the project, Dan Hill, requested that a wetland consultant of his retention, Patrick Garner, be allowed to accompany the town's peer review wetland consultant and the applicant's wetland consultant on the site inspection. If you recall I indicated that I was not sure of the protocol and I would check with our attorneys.

Mr. Deschenes, one of our attorneys on this matter, has offered his opinion that it would not serve the project to entertain a third reviewer on the site inspection. He mentions to me that, of course, Mr. Garner could avail himself of the various documents submitted and/or to be submitted to render his expert opinion to his clients on the matters to which he is an expert.

As the Chair mentioned at the meeting, all comments and correspondence should go through the Conservation Commission via the Chairman so I leave it in your hands to inform Mr. Hill and his associates.

Sincerely,  
LIFETIME GREEN HOMES, LLC
