Subject: Fire Safety at 100 Long Ridge Road

Dear Board,

There has been much discussion lately regarding the entire lack of fire safety features at the proposed Birches development.

I am not so concerned.

In the event of fire, insurance companies will re-emburse the damage; property owners are protected. Undoubtedly the insurance companies would investigate the causes of the fire, and safety features of the development. Accountability will be determined.

I am sure that all parties involved are very well aware of the liabilities here, and that the town and developer will protect their interests and do the right thing with regard to fire safety.

Water quality is another mater. Abutters have not been offered an insurance policy or guarantee of protection. Common sense holds that abutters have a right to be protected. Yet it is this question that as an abutter, holds the utmost concern in my mind.

Sincerely,
Dave Ringheiser
