Regulating Roads

On motion by Ms. Trebino seconded by Ms. Hughes, the members voted unanimously to write to the Selectmen as follows, with a copy to A. Peckham, concerning the proposal to designate certain roads "scenic roads":

that the Planning Board is in the midst of a master plan;
that it is not appropriate to take action on a particular issue;
that a process needs to be established for designating scenic roads that takes into account the cost as well as the benefits of such designation.

In the same motion, the members voted to write to the Selectmen that the Planning Board does not recommend further regulation of access to subdivisions located in adjacent towns because they believe the Board has the authority under present statutes and regulations to regulate such access in cases where public safety is compromised.

Master Plan

After a report by the Planner Assistant on a course which she took at MIT in January which outlined a master planning process, the members instructed her to take advantage of the instructor's invitation to contact him and ask him for more information about the process: defining a request for proposal for a consultant to facilitate the process; the names of 3-5 people who do this; whether the consultant trains people to facilitate or facilitates meetings him/herself; what days of the week work best. Mrs. Olden recommended that the Board consider an all-day meeting instead of neighborhood meetings for community input to the process. The members accepted her recommendation and targeted late October 1992 for such a meeting.
